Original article: <https://doi.org/10.1478/AAPP.96S3A7>, published on 30 November 2018.

The authors have retracted this article because much of the work presented was based on analyses of RNA-seq raw data that was originally generated by a group of former collaborators (Dr. Francesco Giorgianni, Dr. Sarka Beranova-Giorgianni and Dr. Diwa Koirala, in the Department of Pharmaceutical Sciences, University of Tennessee Health Science Center, Memphis, TN, USA). Dr. Donato and colleagues used these data without an explicit authorization of Giorgianni *et al.* All authors have agreed to this retraction and regret the oversight.
